Content

- Adult Learning Principles
- Self Concept Theory

Program Synopsis

This program is fully equipped with the tools and techniques that can be easily applied into every aspect of the daily life. The tools when implemented have a very profound effect on quality of life because it addresses the core issue; **SELF ESTEEM**.

We strongly believe that a person's performance or results is generated from his/her behavior. His/her behavior is strongly governed by their **BELIEFS**. Rather than just tackle the end result that we see from a person's work, we seek to identify the root cause of the **LIMITING BELIEFS** in their belief system. This is more lasting and transformational to employees.

Duration:
2 days program
